

# REBELLING AGAINST EXTINCTION

When we are told the truth about a life and death threat, communities can make very big changes fast, putting aside their differences to work for the greater good.

The pandemic has shown us that another world is possible. We refuse to go back to 'normal'. Business-as-usual is killing us.

- When warnings of scientists and emergency services go unheeded;
- When government leaders lie and tell us a 'gas led recovery' is safe for the planet and future generations;
- When the government spends tax payers money keeping the fossil fuel industry afloat while private investors are divesting;
- When over 80% of Australians want more effective climate policy and action, yet it is barely discussed in parliament.

Conventional politics is failing us. We need new forms of democracy to guide effective action on climate and a just transition beyond fossil fuels.

We refuse to be 'quiet Australians' heading towards extinction.

## JOIN US!

Extinction Rebellion (XR) is an international movement that uses non-violent civil disobedience (non-violent direct action / NVDA) in an attempt to halt mass extinction by human induced climate change and minimise the risk of social collapse.

Everyone can play a part! Connect with your local XR group to hear talks, get training in NVDA, join in local actions, choir, arts workshops, or help with organising.
